Q & A

Q: Will DHCE disturb the healthcare market?

A: DHCE may have influence the healthcare market. DHCE serve as a service hub between different healthcare service providers. We provide information, education and support service to clients in both public and private sectors, so we are not in competition with any other service providers in the market.

Q: What could DHCE do as there are no medical consultation provided?

A: We provide a brand new type of service that focus on disease prevention and management. With our service network and multi-disciplinary team, we help clients to better manage their health.

Q: Will DHCE service overlapping other existing service?

A: Although target group may be overlapping, our service is delivered in new approaches. We aim to connect existing resources in the community to client in need.

Way Forward.....

- Be clear and make clear of the role of DHC in the healthcare system
 - Supportive role in the healthcare system
 - Pull together fragmented care in HK
- Strengthen medical-social collaboration
 - Utilize exiting services effectively by closely collaborate with community partners
- Continuously evaluate and learn with an open-mind
 - Adjust our service to respond to the changing society needs
